

DIGITALLY FIT EVENTS PLATFORM

Full Feature List

Everything currently built and live on the Digitally Fit Events platform, by module.

1. EVENTS MANAGEMENT

- Multi-event hosting per client, with event phases: Nominations → Voting → Closed
- Cover image, banner and poster asset uploads
- Duplicate an existing event (full copy with settings)
- Categories and sub-categories
- Venues (name, address, capacity, map link)
- Speakers with bios, photos, session details
- Sponsors with logos and tier levels
- Event schedule / agenda builder
- Event document uploads (PDFs, programme booklets)
- FAQs per event
- Photo gallery with albums, plus video gallery
- Event registration (attendee sign-up, separate from ticketing)
- Live event feed with real-time stats
- Cancel or archive events

2. NOMINATIONS

- Public nomination form, per event and per category
- Nomination groups (e.g. “Tech”, “Creative”)
- Per-category nomination open/close control
- Approve, reject, or bulk approve/reject nominees
- Promote approved nominees into a voting category
- Close nominations (locks the public form)
- Export nominee list to Excel, per category
- Export nominee phonebook (names + numbers) for SMS
- Nominations Inbox — unified pending-nominee view across events

- Transfer a nominee between categories
- Mark a nominee as winner at the nomination stage

3. VOTING

- Voting categories, independent of nomination categories
- Add voting candidates manually or promote from nominees
- Candidate photo upload with cropping/processing
- Voting open/close control, per category and globally
- Vote bundles — pay-to-vote packs (e.g. 5 votes for KES 50)
- Multi-gateway online voting: Paystack, M-Pesa STK, PawaPay
- USSD voting via shortcode *657*65# — nominee dial string *657*65*{code}#
- Globally sequential nominee codes (001, 002, 003...)
- Voting code generation — one-time or reusable
- Vote session tracking per voter
- Invalidate suspicious votes
- Reconcile USSD pending votes (chunk-by-chunk tool)
- Calculate results per category
- Export results to Excel and PDF
- Announce winners per category; mark individual winners
- Full voting audit log (voter, time, channel, amount)
- Vote statistics dashboard — totals, revenue, top candidates
- Voting results view with percentage breakdowns

4. TICKETING

- Multiple ticket types per event (Early Bird, VIP, Regular, etc.)
- Price, quantity cap, and sale window per ticket type
- Toggle ticket types on/off without deleting
- Promo codes — % or fixed discount, usage limits, expiry, per-code analytics
- Public checkout flow on the frontend
- QR code generation per ticket
- PDF ticket generation and email delivery, incl. Tuqio-branded variant
- Check-in scanning, plus bulk check-in
- Check-in report (arrival, time, gate)
- Ticket transfers — buyer-initiated, admin approve/reject
- Refunds — admin-initiated approve/reject workflow
- Resend ticket email; void a ticket without refund
- Export attendee list, check-in report, and sales report to Excel & PDF

5. PAYMENTS & FINANCIAL

- Gateways: Paystack (card/bank/USSD), M-Pesa STK Push, PawaPay, InstaSend
- Paystack split subaccounts — automatic platform/client revenue split
- Per-event gateway fee calculator (pass to customer or absorb)
- Finance dashboard — revenue, pending payouts, commissions at a glance
- Transaction ledger with filters; export to Excel & PDF
- Revenue reports per event or date range, broken down by stream
- Commission tracking per transaction
- Client balance — running balance after commission deductions
- Invoicing — create, generate PDF, email, mark paid, line items
- Payout workflow: Pending → Approved → Processing → Completed
- Stored payment accounts (bank/mobile money) with primary account flag
- Platform-level refund tracking — approve, process, fail, complete

6. COMMUNICATIONS & NOTIFICATIONS

- Reusable email templates with variable substitution and preview
- Per-event custom email blasts, with scheduled delivery and resend
- Full email log — status, recipient, timestamp
- Reusable SMS templates with preview
- SMS blasts to event contacts via gateway, with delivery tracking
- Full SMS log
- Unified notification log across email + SMS, filterable and exportable

7. POLLS

- Polls attached to an event, or fully standalone
- Multiple-choice or single-choice questions
- Add, edit, and reorder questions and options; bulk-add options
- Publish a poll live, or close it to stop responses
- Reset responses; duplicate a poll for reuse
- Public poll page on the frontend
- Response analytics — counts and percentages per option
- Export poll results to Excel
- Polls dashboard — all polls across events at a glance

8. CMS (CONTENT MANAGEMENT)

- Blog posts — create, edit, publish, feature

- Blog categories and tags
- Comment moderation — approve, reject, mark as spam
- Static pages (About, FAQ, Terms, etc.)
- Media library — upload, download, delete
- Public blog listing and single-post pages

9. CONTACTS & CRM

- Central contacts list across all of a client's events
- Auto-backfill from event registrations and ticket purchases
- Export contacts to Excel

10. CLIENTS & MULTI-TENANCY

- Create and manage clients (event organisers)
- Client dashboard — scoped view of their own events, revenue, votes
- Client subaccounts on payment gateways (Paystack split)
- Client balance tracking and payout history

11. USERS, ROLES & SECURITY

- User management — invite, edit, suspend admin users
- Role-based access control
- Email invitation system for new admin users
- Two-factor authentication (2FA) on admin login
- Audit trail — every admin action logged with user, time, detail
- Activity dashboard — recent platform activity feed
- Password reset flow

12. REPORTS HUB

- Centralised reports hub linking to every report type
- Voting results, ticket sales, attendee list, check-in report
- Revenue report and transaction ledger
- Notification log export
- All exportable to Excel, PDF, or CSV as appropriate

13. SETTINGS & CONFIGURATION

- Platform-wide system settings
- Payment gateway settings — API keys per gateway

- Per-event voting and ticketing settings
- SMS/email gateway configuration

14. PUBLIC FRONTEND (STANDARD MICROSITE)

- Home, Events, Event Detail, Nominees, Nominee Profile
- Nominate, Vote, Vote Bundle, Vote Success
- Tickets, Ticket Checkout, Ticket Confirmation
- Polls, Gallery, Blog, Sponsors, Categories, Groups
- FAQ, About, Contact, Pricing, Become an Organiser
- Floating WhatsApp chat button on every page
